DuraSight™ Introduces Integral Ring/Base Design

DuraSight™ Scope Mounting Systems is pleased to announce the expansion of the line to now include an innovative Integral ring/base design utilizing the proprietary Z2 Alloy material.

“This new system from DuraSight is the ultimate scope mount system in terms of strength and ease of installation,” stated BPI’s President, Dudley McGarity. “The concept is really quite simple,” McGarity continues, “the base and the lower ring are all one unit and are formed in a mold with Z-2 Alloy.” This new system eliminates one of the key weaknesses of traditional two-piece systems and allows for quick and easy set-up by the installer. Best of all, as with all DuraSight products, the strength and cosmetic appeal of the Z-2 integrated system is far superior to any aluminum system on the market, yet the price is very reasonable. The DuraSight Integral Mount comes standard with grade 8 Torx™ screws and is available to fit all makes of in-line muzzleloaders as well as the most popular center-fire rifles currently on the market.

For more information about DuraSight and Z2 Alloy, please visit their website at www.DuraSight.com

BPI is an industry leader in muzzleloading rifles and accessories, hunting rifles, hunting and shooting accessories and shooting components. BPI markets various trusted brand names including CVA®, PowerBelt™ Bullets, Quake Industries, DuraSight™ Sighting Systems and Bergara Barrels.
